SCHEDULE "P"**Sanitary Sewer Fees****Commercial Wastewater Metered Rates**

The commercial wastewater metered rate consists of two components: the commercial fixed charge and the commercial variable consumption charge. The commercial fixed charge covers the cost of the infrastructure to provide wastewater collection and treatment and is determined based on the size of the water service to a property. The commercial variable consumption charge covers the cost of wastewater collection and treatment and is determined as a percentage of the water consumed at a property. These charges are outlined in Tables 1 and 2 below.

<u>Table 1: Commercial Wastewater Fixed Charges</u> <u>Description</u>	<u>Annual Fee</u> <u>Effective January 1, 2026</u>

SCHEDULE "V"Waterworks FeesResidential Metered Water Rate

The residential metered water rate consists of three components: the fixed capital charge, the fixed consumption charge and the variable consumption charge. The fixed capital charge covers the cost of the infrastructure to provide water and is determined based on the size of the service to a property. The fixed consumption charge provides an allotment of water at a fixed price. The amount of water allotted is doubled in the quarter from April 1 to June 30 and the quarter from July 1 to September 30. The variable consumption charge covers the cost of any water used in excess of the allotment of water provided by the base consumption charge. These charges are outlined in Tables 1, 2, and 3 below.

<u>Table 1: Fixed Capital Charges</u>	<u>Annual Charge</u>
<u>Description</u>	<u>(Effective January 1, 2026)</u>
For each property with a 20 mm or smaller service	\$348.69
For each property with a 26 mm service	\$697.39
For each property with a 32 mm service	\$1,220.69
For each property with a 38 mm service	\$1,743.45
For each property with a 51 mm service	\$4,184.30
For each property with a 64 mm service	\$6,973.82
For each property with a 76 mm service	\$8,717.26
For each property with a 102 mm service	\$15,691.07
For each property with a 152 mm service	\$29,638.71

- If a property is served by more than one water service, multiples or combinations of the base rate may apply.

<u>Table 2: Fixed Consumption Charge</u>	<u>(Effective January 1, 2026)</u>				
	<u>Winter (Jan-Mar)</u>	<u>Spring (Apr-June)</u>	<u>Summer (Jul-Sep)</u>	<u>Fall (Oct-Dec)</u>	<u>Annual Charge</u>
Water Allotment (Litres)	45,000	90,000	90,000	45,000	\$215.00

Table 3: Variable Consumption Charge					(Effective January 1, 2026)
Quarter	First 45,000 L	45,000- 90,000 L	90,000- 135,000 L	135,000- 270,000 L	270,000 L+
Oct-Dec/ Jan-Mar	n/a	\$0.97/ 1,000 L	\$0.97/ 1,000 L	\$1.50/ 1,000 L	\$1.50/ 1,000 L
Apr-Jun/ Jul-Sep	n/a	n/a	\$0.97/ 1,000 L	\$1.50/ 1,000 L	\$1.50/ 1,000 L

Should quarterly meter readings not be able to be collected on the first day of the quarter through no fault of the owner of a property, the allotment of water included in the fixed consumption charge will be increased for that period. The increase in the water allotment for that quarter will not impact the water allotment for any subsequent quarter. The daily allotment for each quarter will be determined by dividing the allotment for each quarter by the number of days in the quarter.

Residential Flat-Water Rate

The residential flat-water rate will only be valid for customers until the Utility and Environmental Services Manager has deemed that installations of water meters have proceeded to the point that the neighbourhood where the property is situated should be changed over to the metered rate. The residential flat-water rate consists of three components: the fixed capital charge, the user charge and the irrigation charge. The fixed capital charge covers the cost of the infrastructure to provide water and is determined based on the size of the service to a property. The user charge provides an allotment of water at a fixed price based on the use of the property. The irrigation charge covers the cost of the water used in irrigation. These charges are outlined in Tables 4, 5, and 6 below.

- Where two or more uses are made of a single property or building, multiples or combinations of the user rates will apply.

<u>Table 6: Irrigation Charge</u> <u>Description</u>	<u>Annual Charge</u> <u>Effective January 1, 2026</u>
For each 1,000 m ² of property or portion thereof	\$200.00

- Where the property is only served for a portion of the year, the total annual charges will apply.
- For residential properties the irrigation rate will apply to the entire size of the property except where the terrain is such that a significant portion of the property is unusable, in which case the Utility and Environmental Services Divisional Manager will determine the area to be assessed.
- In commercial zones where the entire property is covered by buildings, asphalt or concrete, the irrigation rate may be waived at the discretion of the Utility and Environmental Services Divisional Manager.

Commercial Metered Water Rate

The commercial metered water rate consists of two components: the fixed capital charge and the variable consumption charge. The fixed capital charge covers the cost of the infrastructure to provide water and is determined based on the size of the service to a property. The variable consumption charge covers the cost of water treatment and distribution. Tables 7 and 8 below will be used to determine the rates.

Waterworks Fees - Commercial Flat Water Rate

The commercial flat water rate will only be valid for customers until a radio frequency enabled water meter has been installed at their property. The commercial flat water rate consists of two components: the fixed capital charge and the user charge. The fixed capital charge covers the cost of the infrastructure to provide water and is determined based on the size of the service to a property. The user charge provides water at a fixed price based on the use of the property. These charges are outlined in Tables 9 and 10 below.
