SCHEDULE B to BYLAW 8271 - Application to Existing Buildings

The level of upgrading required for an existing *building* that is non-compliant with the current *Building Code* is illustrated in the table below. The upgrading is based on the aggregate project value of all *building permits* issued over the previous 24-month period immediately preceding the date of application of a proposed *building permit*, including the value of the proposed project, divided by the assessed value of the building, expressed as a percentage.

For the purpose of applying the table below, when voluntary upgrades for fire alarm systems, sprinkler systems, exits, accessibility, seismic work and building envelop are performed along with other alterations, additions and changes of major occupancy in existing buildings, the applicant may deduct the value of this work from the aggregate value of the project costs.

When considering what is an acceptable level to upgrade existing structures the *Chief Building Official* will be guided by the following table.

Ratio of Project Costs to Assessed Value %	Item to be Upgraded	Location of Upgrading			Notes for Upgrading Work

Schedule B Definitions:

Structural Survey

- 1) When alterations to an existing building do not include an addition and when the total cost of the intended work exceeds 100% but does not exceed 200% of the actual value of the building as determined by the British Columbia Assessment Authority, a structural survey of the existing building may be provided by a registered structural engineer instead of a structural analysis.
- 2) The Structural Survey required by section 1) must:
 - (a) a describe the condition of all structural members and connections;
 - (b) document evidence of deterioration from physical damage, fire, weather or neglect;
 - (c) document evidence of foundation settlement or failure;

- (d) include an evaluation of the building's expected stability with respect to minimum design loads, forces and effects;
 - (e) include an evaluation of the building in conformance with the NRC publication "Guidelines for Seismic Evaluation of Existing Buildings" dated December 1992;
 - (f) document the condition of all flashings, rain gutters, down pipes, chimneys, ornamentation, parapets and appurtenances; and
 - (g) indicate the weather protection ability of the roof and exterior cladding, and the extent of impermeability of the below ground structure, where present.
- 3) Sealed drawings which detail the structural upgrading work required as a result of the survey carried out under section 2) must be provided to the *Chief Building Official* by the *owner*.
 - 4) All structural work referred to in section 3) must be completed prior to final inspection and occupancy.

Structural Analysis

- 1) A Structural Analysis of an existing *building* must be provided to the *Chief Building Official* by a registered structural *engineer* when:
 - (a) the total cost of the intended work exceeds 200% of the value of the *building* as determined by the British Columbia Assessment Authority; or
 - (b) the work includes an *addition* or *alteration* as determined by sections 3.5, 3.6 or 3.7 of this bylaw.
- 2) The Structural Analysis required by section 1) must:
 - (a) take into account the proposed *alterations* and the *building occupancy*;
 - (b) indicate the structural sufficiency of the *building* to safely resist all vertical and lateral loads, including wind and earthquake forces, and any construction loads that may be expected; and
 - (c) show the remedial works necessary to bring the *structure* up to the minimum standards required by Part 4 of the *Building Code*.
- 3) Sealed drawings which detail the structural upgrading work required as a result of the analysis carried out under section 2) must be provided to the *Chief Building Official* by the *owner*.
- 4) All structural work referred to in section 3) must be completed prior to final inspection and occupancy.

Voluntary Upgrade

Where voluntary upgrades for fire alarm systems, sprinkler systems, exits, seismic work and building envelope are performed, it is not the intent of this bylaw to require the *owner* to further upgrade the *building* as detailed in section 3.5 to 3.7 of this bylaw.
